1035

01:24:46.812 --> 01:24:54.689

Sarah: With the wild conures we have been bringing a lot less of them to for the birds in the last few years, thanks to Tino's support.

1036

01:24:55.050 --> 01:25:04.129

Sarah: so as of right now. I think these numbers are right. I've actually realized there's a couple of database we need to update. But I corrected for that. So

1037

01:25:04.250 --> 01:25:11.539

Sarah: Tina has 9. I have 15, for the birds have 15. Dara has 2, and then we have

1038

01:25:11.957 --> 01:25:16.729

Sarah: a couple of outliers in other homes that have been around for longer.

1039

01:25:17.060 --> 01:25:17.940

Sarah: so

1040

01:25:19.420 --> 01:25:31.640

Sarah: for the birds do not have the majority of the wild conures. 6 of the ones they have there. They gave us a detailed report in March, and 6 of those birds are really

1041

01:25:31.850 --> 01:25:37.299

Sarah: not in great shape. They sometimes have problems pooping. I mean, it sounds like.

1042

01:25:37.860 --> 01:25:38.930

Sarah: you know.

1043

01:25:41.890 --> 01:25:45.930

Sarah: Again per the discussion we had in March.

1044

01:25:48.290 --> 01:25:51.719

Sarah: Could they? Could they continue to live if they were not at a vet

1045

01:25:52.150 --> 01:25:56.720

Sarah: permanently? And is it our wish that they live out their lives in a vet.

1046

01:25:57.308 --> 01:26:00.339

Sarah: That's a conversation that I think is so

1047

01:26:00.780 --> 01:26:02.090

Sarah: something we have to

1048

01:26:02.290 --> 01:26:07.809

Sarah: ask ourselves hard questions about, because I don't think we ever bring the birds. They're expecting that they will never leave

1049

01:26:08.665 --> 01:26:11.640

Sarah: but that is what is happening to

1050

01:26:11.900 --> 01:26:14.320

Sarah: a group of that that cohort.

1051

01:26:15.893 --> 01:26:16.866

Sarah: So

1052

01:26:18.640 --> 01:26:24.119

Sarah: progress in terms of managing our costs and not bringing every single bird there. And I think

1053

01:26:24.620 --> 01:26:32.489

Sarah: ongoing consideration and analysis needed for what? For the birds there that really looks like out of that 15

1054

01:26:33.980 --> 01:26:35.539

Sarah: because I'm not sure that

1055

01:26:35.610 --> 01:26:36.839

Sarah: treating them all

1056

01:26:38.060 --> 01:26:44.590

Sarah: with a pet treatment mindset is necessarily in their best interests. But I know it's a difficult topic. And

1057

01:26:45.480 --> 01:26:46.760

Sarah: yeah, there's no.

1058

01:26:46.760 --> 01:26:53.909

Pam: Difficult topic, and a way of looking at it is that the funds spent

1059

01:26:54.300 --> 01:26:57.690

Pam: there could be deployed toward

1060

01:26:58.260 --> 01:27:01.190

Pam: happier circumstances, for other birds.

1061

01:27:02.140 --> 01:27:03.879

Sarah: Yeah, I mean, there's, you know, there's

1062

01:27:04.210 --> 01:27:10.429

Sarah: wildlife care policies versus pet bird policies. If you want to look at it that way. And you know.

1063

01:27:10.650 --> 01:27:17.120

Sarah: we that's that's not a conversation for tonight, so I will leave it there in the sense that at least the numbers are shifting

1064

01:27:17.608 --> 01:27:19.600

Sarah: to help manage our costs.
